DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/09/07 has been entered.
2. Applicant's request for withdrawal of the finality of the Office Action dated 03/08/07 has been considered, but is denied. As noted in the 03/08/07 Final Office Action, all claims were drawn to the same invention claimed in the application prior to entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office Action if they had been entered in the application prior to entry under 37 CFR 1.114 (see the 03/08/07 Office Action at page 4). Accordingly, the 03/08/07 was properly made final and applicant's request is denied.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9, 20, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Morizumi (JP 2003094845) or Masafumi (JP 08-085269).
5. Each of the cited references teaches a substrate comprising a thermal transfer image. Although the present claims are written in product-by-process terms, it is patentability of the claimed article that must be established. Applicant has failed to establish that the recited process steps produces a product which is materially different than the applied prior art. Accordingly, it is the Examiner's position that the present claims are anticipated by the applied prior art.

Allowable Subject Matter

6. Claims 1, 2-4, 10-19 and 22 are allowed.
